Initial Pairing Instructions for
Bluetooth® Keyboard to Mobile Phone

The CR2600 Bluetooth bar code reader is compatible with most Bluetooth keyboard supported smart phones.

1. In your device's list of applications, select the 'Settings' icon.

2. Select the 'Bluetooth' setting.

3. Scan the following code to enable your CR2600 to be discoverable by the phone.

Bluetooth Keyboard Discoverable Mode

M10257_01

4. Once the reader is in discoverable mode, it will beep 2 times. You will have 30 seconds to initiate connection to host device. If 30 seconds elapses without connecting to host device, scan the discoverable mode code again.

5. Your CR2600 bar code reader will appear on the list of Bluetooth devices in the phone, select the reader to initiate connection. Some smart phones will require the user to manually refresh the list of devices before the CR2600 will appear for connection initialization.

6. A window with a PIN will appear on the phone.

7. Once the reader beeps 2 times, the reader is ready for the user to enter the PIN. Using the PIN Number Reference Codes, scan each of the PIN digits with your CR2600. You will have 30 seconds to enter PIN. Scan 'Submit PIN' code when pin sequence has been entered.

8. The Phone will show positive connection indicator when connection is completed. The CR2600 will beep once when connected and the wireless icon LED will remain solid.

PIN Reference Codes

0	1	2	3
M10271_01	M10262_01	M10263_01	M10264_01
4	**5**	**6**	**7**
M10265_01	M10266_01	M10267_01	M10268_01
8	**9**	**Submit PIN**	
M10269_01	M10270_01	M10272_01	

Keyboard Display Options for Apple iOS

To configure the bottom button on the CR2600 to be able to toggle the host device's on-screen keyboard, scan the following:

Keyboard Display Option On

M10259_01

*The Keyboard Display option is not compatible with other operating systems, it is only compatible with Apple iOS.

To reset the bottom button back to the default setting, scan the following:

Keyboard Display Option Off

M10260_01

Re-connect to Other Bluetooth Devices

1. To re-establish connection to another host device already paired with the CR2600, scan the following code:

Switch Host Device

M10258_01

2. The CR2600 will appear in the list of devices in the Bluetooth menu. Select the reader to initiate connection.

Note: If the CR2600 battery has been removed, reader is out of range, or is powered off while in default connection settings, the CR2600 will initiate connection to the most recent host device when back in service.

Clear Connection History

To clear connection information from all Bluetooth Keyboard hosts, scan the following:

Clear Bluetooth Connection

M10261_01

Note: To re-establish connection once connection history has been cleared, repeat steps 1-8 of Initial Pairing Instructions.
